

SOLDERING ACCESSORIES

Regular Soldering Flux Paste

PART No. 1711881
 LACO REGULAR SOLDERING FLUX PASTE
 113G

PART No. 1711882
 LACO REGULAR SOLDERING FLUX PASTE
 56G

LA-CO Regular Flux is the ultimate flux for all copper soldering applications. The all-weather water-soluble paste won't leave residue in water piping and contains no zinc chloride to reduce corrosion concerns. Available in 56g, 113g and 453g sizes.

Features

- Non-acid, non-toxic, and lead-free
- For use on copper, brass, galvanised iron, lead, zinc, tin, mild steel, terne plate, and malleable iron. It can be used to solder silver parts together, but it cannot be used with silver solder sticks.
- Regular flux paste can be used with most common soft solders, such as 85/15 and 95/5
- Cleans pipe upon application, allowing solder to run more smoothly around the pipe
- All-weather formula for use in hot and cold climates
- Made in USA

Application

- All lead-free and common soft solders
- Copper
- Brass
- Galvanised iron
- Lead
- Zinc
- Tin
- Silver
- Nickel
- Mild steel
- Terne plate
- Malleable iron
