

Bromic Oxyset Mobile Brazing Kit

(Item Number: 1811167-3)

Description

A lightweight, portable welding & brazing system, for use with disposable gas cylinders. Independently tested to EN1326 its compact, durable & lightweight cylinder rack, makes the Oxyset ideal for those hard-to-reach areas. A mixture between oxygen and gas fuel is preferred in many scenarios due to its adjustable heat output. With this in mind, the Oxyset kit is suitable for a variety of applications including welding, brazing, silver soldering and heating.

Included in Box

- Welding Torch
- Goggles, 1 piece
- Spanner, 1 piece
- Welding nozzle, 5 pieces
- Cylinder rack, 1 piece
- Flint Sparker
- Hose pair with brass fitting, 5mm ID, 2m long, 1 piece
- Flashback arrestors for torch, 2 pieces
- Check valves for regulators, 2 pieces
- Oxygen regulator with 2 gauges, 1 piece
- Map Pro regulator with 1 gauge, 1 piece

Specification

- Gas/flame adjustment for both oxygen and fuel
- When correct blue flame is present, it burns at approx. 3000°C
- Manual ignition (flint sparker provided)
- Read manual including all the warnings and how to connect and light the torch.
- Warranty = 12 months

Compatible Cylinders

- M12x1 cylinder thread: oxygen 1L oxygen cylinder (1811320)
- CGA600 cylinder thread: Map pro cylinder (1811120).

Indicative Consumption rates:

Nozzle	Oxygen Pressure PSI	LPG Pressure PSI	Oxygen Flow LPM	LPG LPM
#1 1.6mm	16	1	6.8	1.9
#2 1.8mm	50	1	12.9	2.1
#3 2.0mm	60	1	14.4	2.1
#4 2.2mm	60	1	14.7	2.1
#5 2.4mm	65	1.2	16.2	2.2

Spare Parts

Item Number	Description
1811161-1	2 flashback arrestors & 2 check valves Oxyset
1811163-1	Hose Assembly for BR Oxyset (G3/8, G1/4)
1811164-1	Torch for BR Oxyset
1811171-2	Map-Pro Regulator for Bromic Oxyset
1811172-2	Oxygen Regulator for Bromic Oxyset
1811179-1	O-Ring for Bromic Oxyset Oxy Reg End Pack 3
1811184	Flint Sparker for Bromic Oxyset 1811167-3
1811182-1	5 pack Welding Nozzles for Bromic Oxyset 1811167-3

FAQs

What is the flame temperature? The flame temperature is about 3200 degrees Celsius, but this depends on the ratio of oxygen to fuel when burning.

What is the working pressure for each gas? Map-Pro has a working pressure of 0.5-0.9 bar. Oxygen has a working pressure of 4-6 bar.
