

CHROME PLATED FLOOR SOCKET

(Item Number: 1510151)

DESCRIPTION

Female bayonet fittings can be installed on the wall or floor inside your home (or outside for a BBQ). This allows homeowners to easily connect their gas appliances.

HOW IT WORKS

A gas technician is required to install the female bayonet in your home so that it complies with all the gas installation codes, such as AS/NZS 5601. This will connect the gas lines (Natural gas or LPG) to your hose.

The gas fitting uses a brass push and clockwise twist-to-lock fitting.

MAINTENANCE

When the bayonet gas fitting is not in use, it needs to be protected from debris and insects. Protect the fitting by inserting dust plugs or securing plastic bags around the connectors to ensure the connection isn't clogged for use next winter season.

The plastic cap that it came with can be used, or black plastic cap incl tie (1510957).

SPECIFICATIONS

- 14 kPa rated working pressure
- Temperature limitation: 0-60°C
- Flow rate for given pressure drop: pressure drop 1.13kPa to 1.0kPa Flow rate 2.46 m³/hr of natural gas
- AGA 6421 approval to AS 4627

MATERIALS

- O-rings: rubber
- Main body: brass alloy
- Internal spring: Stainless Steel
- Finish: natural brass, chrome plated, nickel plated
- Lubricant on main o-ring

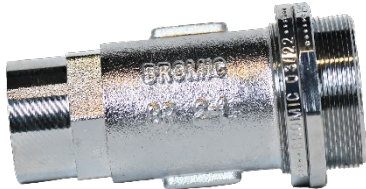

INSTALLATION

Install as per AS/NZS 5601.1 & AS/NZS 5601.2 Gas Installation Code
