

Natural Gas Conversion Kit

Part No: 9499040

3/8" SAE female hose connected to regulator
fitted with 1.5 metre bayonet hose.

IMPORTANT:

- All Work must be carried out by an authorised person.
- All joints must be leak tested prior to use.

The flexible hose assemblies within this kit are not designed for a permanent out-door installation, and must be installed under protective cover to limit the effects of the weather.

All hose assemblies have a limited lifetime. Please check regularly for signs of deterioration. Should any signs of deterioration exist, the assembly must be replaced immediately.

The appliance must be installed in accordance with the installation requirements of the local supply authority, or the appropriate installation code issued by the Australian Gas Association or the Australia Liquefied Petroleum Gas Association.

If after following the instructions provided, satisfactory performance cannot be obtained, contact Bromic on the details below for advice and assistance.
